Profile summary

Highly experienced and results-driven professional with a diverse background spanning supply chain management, agriculture, IT consultancy, and project management. Possesses a proven track record of successful leadership and decision-making across various domains. Proficient in financial management, strategic planning, and negotiation, with a strong commitment to quality and efficiency. Skilled in a range of programming languages, including Swift and Python, and well-versed in supply chain management and ERP systems. Committed to continuous learning and improvement as evidenced by ongoing education in Supply Chain Management and recent certifications in Google Data Analytics and Business Analysis. Eager to further expand and deepen expertise within the supply chain sector, especially in the area of procurement.

Working experience

ASSISTANT STORE MANAGER, E-FOOD DARK STORES . 2023 - ONGOING

Working close with the store manager in the daily business operations of the store. My main responsibilities are

- Provide leadership and guidance to the store team, including Pickers, Packers, and Delivery Drivers.
- Inventory management. Oversee inventory levels, including monitoring stock levels, rotation, and order processing and ensure accurate and timely restocking of grocery products
- Quality control. Make sure quality standards are met
- Financial management. Invoicing incoming products and supplier returns.

FARM MANAGER. 2005 - ONGOING

Owner and manager of 30 acres of arable land with vegetable, wheat and cotton cultivations. Main responsibilities:

- Working alongside a team of workers in order to make sure daily operations are completed
- Financial management of the business.
- Planning of inflows and negotiating prices with suppliers.
- Finding buyers and negotiating prices and product volumes.

BOARD OF DIRECTORS MEMBER. THESGI FARMERS COOPERATIVE, 2015 - 2020

As a member of the BoD of Thesgi in the role of Financial Officer, I was responsible for planning, reporting and executing various duties. Some of these were:

- Planning and setting strategic objectives for the growth of the cooperative
- Staff recruitment

- Conducting negotiations with suppliers and clients, ensuring volume and price demands are met
- Budget planning

CO-FOUNDER - IT CONSULTANT. OFFICE NET IT SOLUTIONS, 2008- 2014

My role as an IT consultant was to design, implement and support IT solutions for businesses. More specific I dealt with ERP software installation, configuration and support, network design and implementation and website development using CMS tools.

COMPUTER SCIENCE TUTOR. 2010 - 2015

As a computer tutor, I worked on teaching introduction to computer programming principles as well as computer driving licence certifications for kids, teenagers and adults. I also taught programming principles to high school students in order to help them prepare for their university entry exams.

PRODUCT OWNER / PROJECT MANAGER. FORTHEFESTIVALS APP, 2019-2020

As a product owner at "forthefestivals" app I had the responsibility for organizing the team members and assigning the tasks that needed to be fulfilled. I was entitled with the responsibility to make decisions that best fitted user needs and expectations.
